

# Standard Headwall

Standard headwalls serve to control erosion, anchor culverts or pipes and direct water flow at the end of pipe into water course such as ponds. Headwalls act as a retaining wall at the entrance or exit of pipe or culvert to support the surrounding soil.

## Benefits

- Quick and easy to install.
- No mechanical fasteners required, no extra site work to be done
- Utilizes standard lifting devices for ease of handling
- Quick on-site assembly that reduces construction time
- Reduction in construction cost due to speed of installation
- Complete with grate OPSD 804.05

**EASY TO  
INSTALL**

**SUSTAINABLE  
PRODUCT**

**MADE TO  
OPSD**

## Specifications

- OPSD 804.030
- Grates - OPSD 804.05
